

Please do not limit XMs ability to broadcast locally oriented stations, such as traffic and weather by accecting the NAB's petition 04-160. These stations are important to the listens and are more efficient and effective than those offered by commercial radio stations. I am a completely satisfied XM subscriber, mainly because of the variety in stations offered, lack of commercial and quality that is unmatched. I pay for these programs, and the services should not be limited. The weather and traffic stations offer safety and convience to XM listeners, up-to-the-minute traffic and weather are imperative and should be available.
